**Title**: Bow Wow Ball

Who: Garrett Sippel, Walker Schmidt, Jimmy Wiley, Suchita Lulla, Peilin Xin

Project Tracker: https://trello.com/b/jMtj35jn/software-final-project

VCS: https://github.com/walkyd12/Team15

Screenshot:
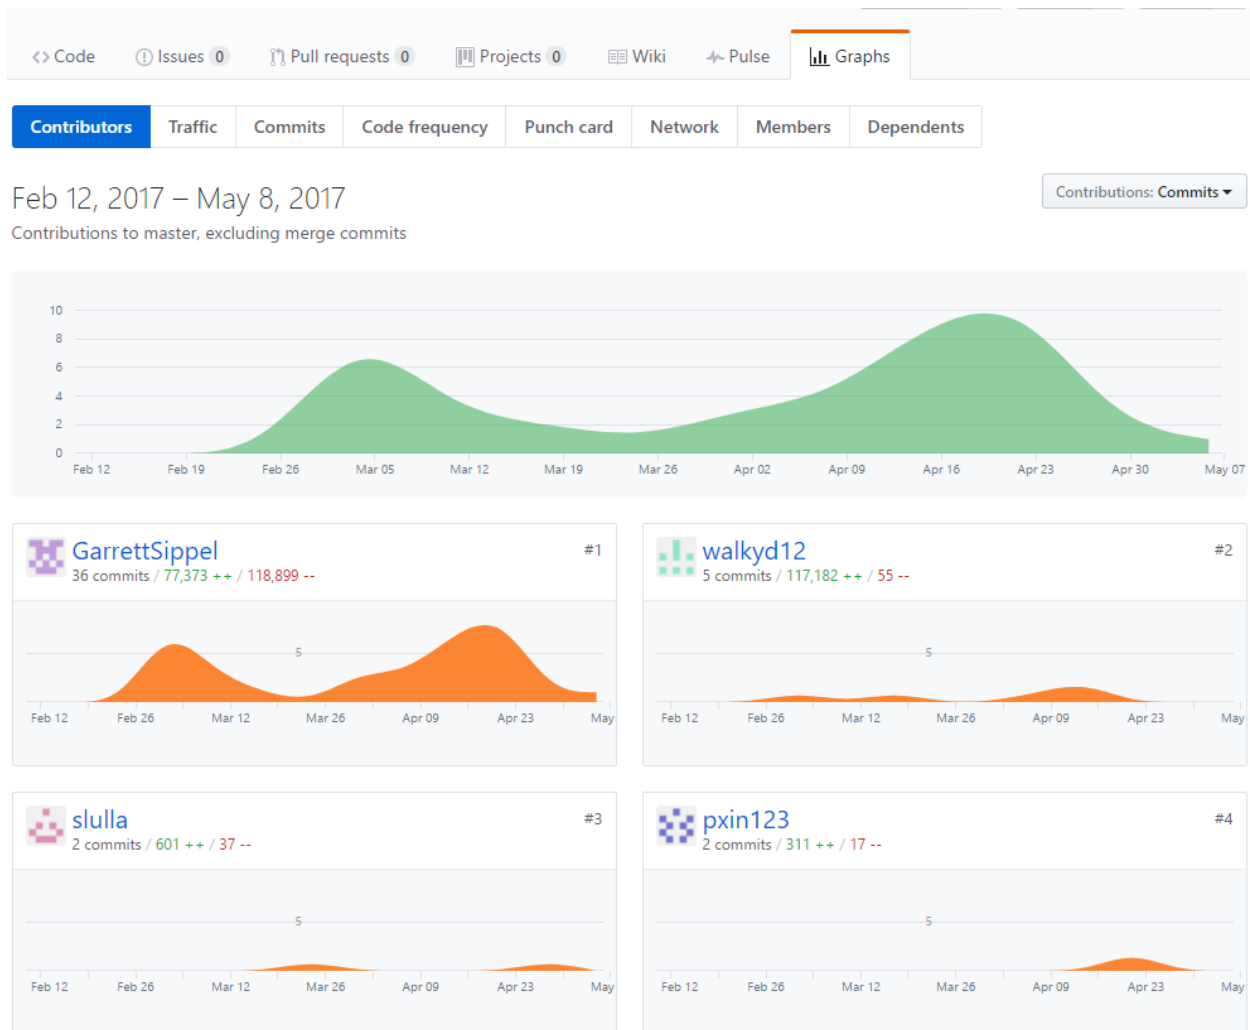

I do not know why Jimmy does not have a graph, because he did make commits, you can see them if you go to Code->commits, but for some reason they won't show in the graph.

Deployment: There is a BowWowBall.exe in the repository, in the Final Project folder. It requires the BowWowBall_Data folder to be in the same folder as the .exe to run. If you clone the repository it will already be set up correctly, just run the BowWowBall.exe.
